FEDERAL POLITICS

THE CANADIAN PRESS

October 9th, 2019

METHODOLOGY

METHODOLOGY

Web survey using computer-assisted Web interviewing (CAWI) technology.

From October 7th to October 8th, 2019

2,150 Canadians, 18 years of age or older, who have the right to vote in Canada, randomly recruited from LEO's online panel.

Using data from the 2016 Census, results were weighted according to age, gender, mother tongue, region and level of education in order to ensure a representative sample of the population.

No margin of error can be associated with a non-probability sample (Web panel in this case). However for comparative purposes, a probability sample of 2,150 respondents would have a margin of error of ±2.11%, 19 times out of 20.

The research results presented here are in full compliance with the CRIC Public Opinion Research Standards and Disclosure Requirements.

METHODOLOGY

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion that that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-Present at the following e-mail address: cbourque@leger360.com

APPENDIX

DETAILED METHODOLOGY

Sampling Frame

Participants were randomly selected from LEO's online panel.

Leger owns and manages an Internet panel that includes more than 400,000 Canadians coast to coast. An online panel consists of Web users profiled according to different demographic variables. The majority of Leger's panel members (60%) were randomly recruited over the phone in the past ten years, which makes this panel very similar to the current Canadian population on a number of demographic characteristics. Moreover, 35% of panellists were recruited through affiliate programs and 5% through partner campaigns and programs.

To be eligible, respondents were required to be 18 years of age or older and have the right to vote in Canada.
