Association for Canadian Studies • Association d'études canadiennes

June 1st, 2020

METHODOLOGY

METHODOLOGY

Web survey using computer-assisted Web interviewing (CAWI) technology.

From May 29th to May 31st, 2020

1,536 Canadians and 1,002 Americans, 18 years of age or older, randomly recruited from LEO's online panel.

Using data from the 2016 Census, results were weighted according to gender, age, mother tongue, region, education level and presence of children in the household in order to ensure a representative sample of the population.

No margin of error can be associated with a non-probability sample (Web panel in this case). However for comparative purposes, a probability sample of 1,536 respondents would have a margin of error of ±2.50%, 19 times out of 20, while a probability sample of 1,002 would have a margin of error of ±3.1%, 19 times out of 20.

The research results presented here are in full compliance with the CRIC Public Opinion Research Standards and Disclosure Requirements.

METHODOLOGY

Notes on Reading this Report

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion that that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-Present at the following e-mail address: cbourque@leger360.com or Jack Jedwab, President & CEO of the Association for Canadian Studies: jack.jedwab@acs-aec.ca

ANNEXES

DETAILED METHODOLOGY

Sampling Frame

Participants were randomly selected from LEO's online panel.

Leger owns and manages an Internet panel that includes more than 400,000 Canadians coast to coast. An online panel consists of Web users profiled according to different demographic variables. The majority of Leger's panel members (60%) were randomly recruited over the phone in the past ten years, which makes this panel very similar to the current Canadian population on a number of demographic characteristics. Moreover, 35% of panellists were recruited through affiliate programs and 5% through partner campaigns and programs.

To be eligible, respondents were required to be 18 years of age or older.

DETAILED METHODOLOGY

Weighted and Unweighted Sample

The table below presents the Canadian geographic distribution of respondents before weighting.

Province	Unweighted	Weighted
British Columbia	160	208
Alberta	125	172
Manitoba/Saskatchewan	125	100
Ontario	604	590
Quebec	419	360
Atlantic	105	103

The table below presents the American geographic distribution of respondents before weighting.

US region	Unweighted	Weighted
NorthEast	220	179
MidWest	199	217
South	298	372
West	285	233

DETAILED METHODOLOGY

Weighted and Unweighted Sample for Canada

The following tables present the demographic distribution of respondents according to gender, age and language (mother tongue) for Canada.

GENDER	Unweighted	Weighted
Male	774	741
Female	762	795

AGE	Unweighted	Weighted
Between 18 and 34	419	389
Between 35 and 54	524	492
55 or over	593	593

LANGUAGE (MOTHER TONGUE)	Unweighted	Weighted
English	1,036	988
French	319	319
Other	204	180

The sample thus collected has a minimum weighting factor of 0.0712 and a maximum weighting factor of 4.7195. The weighted variance is 0.4013.

DETAILED METHODOLOGY

Weighted and Unweighted Sample for The United States

The following tables present the demographic distribution of respondents according to gender and age for The United States.

GENDER	Unweighted	Weighted
Male	502	486
Female	516	500

AGE	Unweighted	Weighted
Between 18 and 29	108	220
Between 30 and 39	195	172
Between 40 and 49	182	186
Between 50 and 64	302	250
65 or older	215	172

The sample thus collected has a minimum weighting factor of 0.0712 and a maximum weighting factor of 4.7195. The weighted variance is 0.4013.
