METHODOLOGY

Web survey using computer-assisted Web interviewing (CAWI) technology.

From May 15th to May 17th, 2020

1,513 Canadians and 1,001 Americans, 18 years of age or older, randomly recruited from LEO's online panel.

Using data from the 2016 Census, results were weighted according to gender, age, mother tongue, region, education level and presence of children in the household in order to ensure a representative sample of the population.

No margin of error can be associated with a non-probability sample (Web panel in this case). However for comparative purposes, a probability sample of 1,513 respondents would have a margin of error of $\pm 2.52\%$, 19 times out of 20, while a probability sample of 1,001 would have a margin of error of $\pm 3.1\%$, 19 times out of 20.

The research results presented here are in full compliance with the CRIC Public Opinion Research Standards and Disclosure Requirements.

METHODOLOGY

Notes on Reading this Report

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-President at the following e-mail address: cbourque@leger360.com or Jack Jedwab, President & CEO of the Association for Canadian Studies: jack.jedwab@acs-aec.ca

LIFTING OF PROTECTIVE MEASURES

LIFTING OF THE CONFINEMENT / SOCIAL DISTANCING MEASURES

CTC78. Who do you trust the most to set the date for the lifting of the confinement / social distancing measures?

Base: All respondents (n=1,513)

	TOTAL CANADA	ATL	QC	ON	MB/SK	AB	BC	18-34	35-54	55+	Urban	Sub-urban	Rural
Weighted n =	1,513	103	355	581	99	170	205	413	516	585	613	585	292
Unweighted n =	1,513	100	411	600	125	125	152	449	495	569	648	569	278
Federal government	31%	28%	25%	39%	34%	30%	23%	38%	31%	27%	34%	30%	27%

VIEWS ON THE CONTINUATION OF SUPPORT PROGRAMS

CTC77. Below are two points of view regarding the many government programs supporting Canadians and businesses during the time of the pandemic. Which point of view is closest to your own? Base: All respondents (n=1,513)

- Some/Other people have said the government support programs are essential help to families and businesses during the time of the pandemic and even though the crisis is passing, they should be maintained well into the summer before they are scaled back in any way.
- Other/Some people have said the government support programs were vitally important to families and businesses at the time of the crisis and total shut down, but the crisis is passing and now is the time these programs should be scaled back to encourage Canadians to return to work and businesses to start operating again.

ANNEXES

DETAILED METHODOLOGY

Sampling Frame

Participants were randomly selected from LEO's online panel.

Leger owns and manages an Internet panel that includes more than 400,000 Canadians coast to coast. An online panel consists of Web users profiled according to different demographic variables. The majority of Leger's panel members (60%) were randomly recruited over the phone in the past ten years, which makes this panel very similar to the current Canadian population on a number of demographic characteristics. Moreover, 35% of panellists were recruited through affiliate programs and 5% through partner campaigns and programs.

To be eligible, respondents were required to be 18 years of age or older.

DETAILED METHODOLOGY

Weighted and Unweighted Sample

The table below presents the Canadian geographic distribution of respondents before weighting.

Province	Unweighted	Weighted
British Columbia	152	205
Alberta	125	170
Manitoba/Saskatchewan	125	99
Ontario	600	581
Quebec	411	355
Atlantic	100	103

The table below presents the American geographic distribution of respondents before weighting.

US region	Unweighted	Weighted
NorthEast	201	179
MidWest	200	217
South	319	371
West	281	233

DETAILED METHODOLOGY

Weighted and Unweighted Sample for Canada

The following tables present the demographic distribution of respondents according to gender, age and language (mother tongue) for Canada.

GENDER	Unweighted	Weighted
Male	787	735
Female	726	778

AGE	Unweighted	Weighted
Between 18 and 34	449	413
Between 35 and 54	495	516
55 or over	569	585

LANGUAGE (MOTHER TONGUE)	Unweighted	Weighted
English	946	997
French	338	315
Other	226	198

The sample thus collected has a minimum weighting factor of 0.1710 and a maximum weighting factor of 3.4774. The weighted variance is 0.3433.

DETAILED METHODOLOGY

Weighted and Unweighted Sample for The United States

The following tables present the demographic distribution of respondents according to gender and age for The United States.

GENDER	Unweighted	Weighted
Male	504	485
Female	497	516

AGE	Unweighted	Weighted
Between 18 and 29	114	220
Between 30 and 39	178	172
Between 40 and 49	190	186
Between 50 and 64	302	250
65 or older	217	172

The sample thus collected has a minimum weighting factor of 0.1710 and a maximum weighting factor of 3.4774. The weighted variance is 0.3433.
