May 25th, 2020

Leger

METHODOLOGY

Web survey using computer-assisted Web interviewing (CAWI) technology.

From May 22nd to May 25th , 2020

1,510 Canadians and 1,005 Americans, 18 years of age or older, randomly recruited from LEO's online panel.

Using data from the 2016 Census, results were weighted according to gender, age, mother tongue, region, education level and presence of children in the household in order to ensure a representative sample of the population.

No margin of error can be associated with a non-probability sample (Web panel in this case). However for comparative purposes, a probability sample of 1,510 respondents would have a margin of error of $\pm 2.52\%$, 19 times out of 20, while a probability sample of 1,005 would have a margin of error of $\pm 3.1\%$, 19 times out of 20.

The research results presented here are in full compliance with the CRIC Public Opinion Research Standards and Disclosure Requirements.

METHODOLOGY

Notes on Reading this Report

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-President at the following e-mail address: cbourque@leger360.com or Jack Jedwab, President & CEO of the Association for Canadian Studies: jack.jedwab@acs-aec.ca

INFORMATION SHARED ABOUT THE VIRUS

INFORMATION SHARED BY GOVERNMENTS

CTC88. Do you believe that governments are telling you the whole truth about COVID-19 or are they deliberately withholding information?

Base: All respondents (n=1,510)

	TOTAL CANADA	ATL	QC	ON	MB/SK	AB	BC	18-34	35-54	55+	Urban	Sub-urban	Rural
Weighted n =	1,510	103	354	580	99	169	205	412	515	583	631	563	287

ANNEXES

DETAILED METHODOLOGY

Sampling Frame

Participants were randomly selected from LEO's online panel.

Leger owns and manages an Internet panel that includes more than 400,000 Canadians coast to coast. An online panel consists of Web users profiled according to different demographic variables. The majority of Leger's panel members (60%) were randomly recruited over the phone in the past ten years, which makes this panel very similar to the current Canadian population on a number of demographic characteristics. Moreover, 35% of panellists were recruited through affiliate programs and 5% through partner campaigns and programs.

To be eligible, respondents were required to be 18 years of age or older.

DETAILED METHODOLOGY

Weighted and Unweighted Sample

The table below presents the Canadian geographic distribution of respondents before weighting.

Province	Unweighted	Weighted
British Columbia	150	205
Alberta	125	169
Manitoba/Saskatchewan	125	99
Ontario	601	580
Quebec	409	354
Atlantic	100	103

The table below presents the American geographic distribution of respondents before weighting.

US region	Unweighted	Weighted
NorthEast	215	180
MidWest	210	218
South	298	373
West	282	234

DETAILED METHODOLOGY

Weighted and Unweighted Sample for Canada

The following tables present the demographic distribution of respondents according to gender, age and language (mother tongue) for Canada.

GENDER	Unweighted	Weighted
Male	757	733
Female	753	777

AGE	Unweighted	Weighted
Between 18 and 34	454	412
Between 35 and 54	518	515
55 or over	538	583

LANGUAGE (MOTHER TONGUE)	Unweighted	Weighted
English	954	1,007
French	340	314
Other	213	185

The sample thus collected has a minimum weighting factor of 0.0989 and a maximum weighting factor of 3.9086. The weighted variance is 0.3292.

DETAILED METHODOLOGY

Weighted and Unweighted Sample for The United States

The following tables present the demographic distribution of respondents according to gender and age for The United States.

GENDER	Unweighted	Weighted
Male	503	487
Female	518	502

AGE	Unweighted	Weighted
Between 18 and 29	109	221
Between 30 and 39	186	173
Between 40 and 49	172	187
Between 50 and 64	316	251
65 or older	222	173

The sample thus collected has a minimum weighting factor of 0.0989 and a maximum weighting factor of 3.9086. The weighted variance is 0.3292.
