NORTH AMERICAN TRACKER

# Leger

February 20<sup>th</sup>, 2023

EDITION

THE CANADIAN PRESS 

## METHODOLOGICAL APPROACH

### METHODOLOGY

Leger, the largest Canadian-owned polling and marketing research firm, in collaboration with The Canadian Press, conducted this web survey with a representative sample of **1,002 Americans** over the age of 18, selected from LEO's (Leger Opinion) representative panel. The questionnaire consisted of 25 questions and was completed in 10 minutes on average. Data collection took place from **February 17<sup>th</sup>, 2023, to February 19<sup>th</sup>, 2023**, via Computer-Assisted Web Interviewing technology (CAWI).

Using 2020 U.S. Census reference variables, the American data was then analyzed and weighted by our statisticians according to gender, age, region, race/ethnicity, household size and education level in order to render a representative sample of the general population.

## METHODOLOGICAL APPROACH

### METHODOLOGY

A margin of error cannot be associated with a non-probability sample in a panel survey. For comparison purposes, a probability sample of this size would have a margin of error  $\pm 2.49\%$ , **19 times out of 20** for the Canadian sample and of  $\pm 3.09\%$ , **19 times out of 20** for the American sample. The results presented in this study comply with the public opinion research standards and disclosure requirements of CRIC (the Canadian Research and Insights Council) and the global ESOMAR network. Leger is a founding member of CRIC and is actively involved in raising quality standards in the survey industry. President Jean-Marc Léger is a member of the CRIC's Board of Directors and the Canadian representative of ESOMAR.

# NOTES ON READING THIS REPORT

## METHODOLOGY

The numbers presented have been rounded. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicates a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicates a significantly higher proportion than that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-President at the following e-mail address: [cbourque@leger360.com](mailto:cbourque@leger360.com) or Jack Jedwab, President & CEO of the Association for Canadian Studies: [jack.jedwab@acs-aec.ca](mailto:jack.jedwab@acs-aec.ca).

# APPENDIX

# DETAILED METHODOLOGY

## WEIGHTED AND UNWEIGHTED SAMPLE FOR THE UNITED STATES

The following tables present the demographic distribution of respondents according to gender and age for the United States.

US Region	Unweighted	Weighted
NorthEast	215	180
MidWest	222	206
South	315	383
West	250	233

GENDER	Unweighted	Weighted
Male	505	484
Female	497	518

AGE	Unweighted	Weighted
18-34	155	265
35-54	405	333
55+	442	404

The sample thus collected has a minimum weighting factor of 0.1629 and a maximum weighting factor of 4.9326. The weighted variance is 0.5594.
