NORTH AMERICAN TRACKER

Leger

February 10th, 2022
EDITION

THE CANADIAN PRESS

METHODOLOGICAL APPROACH
METHODOLOGY

Leger, the largest Canadian-owned polling and marketing research firm, in collaboration with The Canadian Press, conducted this web survey with a representative sample of **1,546 Canadians and 1,005 Americans,** over the age of 18, selected from LEO's (Leger Opinion) representative panel. The questionnaire consisted of 25 questions and was completed in 10 minutes on average. Data collection took place from **February 04th, 2022, to February 06th, 2022**, via Computer-Assisted Web Interviewing technology (CAWI).

Using 2016 Census reference variables, the Canadian data was then analyzed and weighted by our statisticians according to gender, age, mother tongue, region, education level, and presence of children in households. Using 2010 U.S. Census reference variables, the American data was then analyzed and weighted by our statisticians according to gender, age, region, race/ethnicity, household size and education level in order to render a representative sample of the general population.

METHODOLOGICAL APPROACH
METHODOLOGY

The LEO (Leger Opinion) panel is the largest Canadian panel with over 400,000 representative panelists from all regions of Canada. LEO was created by Leger based on a representative Canadian sample of Canadian citizens with Internet access.

LEO's panelists were randomly selected (RDD) through Leger's call centre, panelists from more hard-to-reach target groups were also added to the panel through targeted recruitment campaigns. The double opt-in selection process, a model to detect fraud and the renewal of 25% of the panel each year ensures complete respondent quality. To ensure a higher response rate and reach people on their mobile devices, Leger has also developed a high-performance Apple and Android application.

In fact, Leger is the only Canadian research firm offering both the number and quality of panelists. Most competing polling firms in Canada and the United States also use the LEO panel.

METHODOLOGICAL APPROACH
METHODOLOGY
A margin of error cannot be associated with a non-probability sample in a panel survey. For comparison purposes, a probability sample of this size would have a margin of error **±2.49%, 19 times out of 20** for the Canadian sample and of **±3.091%, 19 times out of 20** for the American sample. The results presented in this study comply with the public opinion research standards and disclosure requirements of CRIC (the Canadian Research and Insights Council) and the global ESOMAR network. Leger is a founding member of CRIC and is actively involved in raising quality standards in the survey industry. President Jean-Marc Léger is a member of the CRIC's Board of Directors and the Canadian representative of ESOMAR.

METHODOLOGICAL APPROACH
METHODOLOGY

Leger is the polling firm that has presented the most accurate data, on average, over the last ten years in Canada. During the last federal election in 2021, Leger was once again **the most accurate firm in the country**. This accuracy is attributed to the quality of the LEO panel and rigorous application of methodological rules by Leger's 600 employees, including 200 professionals in Leger's eight offices across Canada (Montreal, Toronto, Quebec City, Winnipeg, Calgary, Edmonton and Vancouver) and in the United States (Philadelphia).

Poll aggregator 338Canada.com gave Leger the highest rating among all polling firms in Canada for the accuracy of its studies. See https://338canada.com/pollster-ratings.htm

2021 CANADIAN FEDERAL ELECTION						
LEGER SURVEY Published in *Le Journal de Montréal and The National Post/Postmedia* September 18, 2021	33%	32%	19%	7%	6%	2%

NOTES ON READING THIS REPORT
METHODOLOGY

The numbers presented have been rounded. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicates a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicates a significantly higher proportion that that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-President at the following e-mail address: cbourque@leger360.com or Jack Jedwab, President & CEO of the Association for Canadian Studies: jack.jedwab@acs-aec.ca.

For any questions related to our services, or to request an interview, please contact us **by clicking here**.
THE STATE OF THE PANDEMIC

FEELING ABOUT THE STATE OF THE PANDEMIC (1/2)

CTC921. Please tell me which of the following best represents how you feel about the current state of the COVID-19 pandemic.
Base: All respondents (n=1,546)

I don't feel comfortable at all with easing safety measures right now. This COVID-19 still is scary for me

14% | **I am anxious**

We should be careful in terms of how quickly we ease safety measures, since we are not out of the woods yet

43% | **I am prudent**

I am adequately vaccinated and with Omicron being less serious, it is about time we reopen and learn to live with this thing and move on

29% | **I am ready**

I have been opposed to mandates and government measures for a while and believe governments should cease all public safety measures and give us back our freedom

14% | **I am angry**
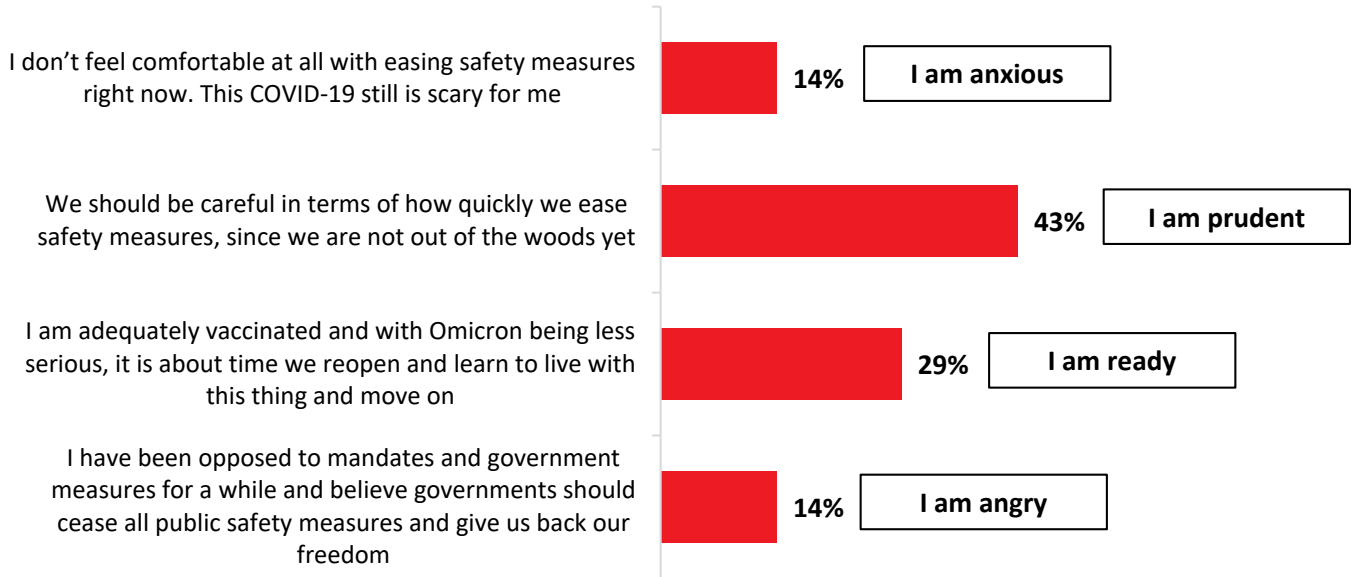

8

APPENDIX

DETAILED METHODOLOGY
WEIGHTED AND UNWEIGHTED SAMPLE

The table below presents the Canadian geographic distribution of respondents before weighting.

Province	Unweighted	Weighted
British Columbia	156	210
Alberta	136	173
Manitoba/Saskatchewan	125	101
Ontario	606	594
Quebec	419	363
Atlantic	104	106

The table below presents the American geographic distribution of respondents before weighting.

US Region	Unweighted	Weighted
NorthEast	210	180
MidWest	210	218
South	332	373
West	253	234

DETAILED METHODOLOGY

WEIGHTED AND UNWEIGHTED SAMPLE FOR CANADA

The following tables present the demographic distribution of respondents according to gender, age and language (mother tongue) for Canada.

GENDER	Unweighted	Weighted
Male	853	751
Female	693	795

AGE	Unweighted	Weighted
Between 18 and 34	479	410
Between 35 and 54	606	538
55 or over	461	597

LANGUAGE (MOTHER TONGUE)	Unweighted	Weighted
English	948	996
French	369	322
Other	226	227

The sample thus collected has a minimum weighting factor of 0.1619 and a maximum weighting factor of 4.8472. The weighted variance is 0.4233.

DETAILED METHODOLOGY

WEIGHTED AND UNWEIGHTED SAMPLE FOR THE UNITED STATES

The following tables present the demographic distribution of respondents according to gender and age for the United States.

GENDER	Unweighted	Weighted
Male	491	487
Female	514	518

AGE	Unweighted	Weighted
Between 18 and 29	83	179
Between 30 and 39	177	215
Between 40 and 49	230	207
Between 50 and 64	292	292
65 or older	223	173

The sample thus collected has a minimum weighting factor of 0.2050 and a maximum weighting factor of 4.5471. The weighted variance is 0.4620.
