
NORTH AMERICAN TRACKER

Leger

Septembre 2nd, 2021

EDITION

THE CANADIAN PRESS 

METHODOLOGICAL APPROACH

METHODOLOGY

Leger, the largest Canadian-owned polling and marketing research firm, in collaboration with The Canadian Press, conducted this web survey with a representative sample of **1,544 Canadians and 1,004 Americans**, over the age of 18, selected from LEO's (Leger Opinion) representative panel. The questionnaire consisted of 25 questions and was completed in 10 minutes on average. Data collection took place from **August 27th, 2021, to August 29th, 2021**, via Computer-Assisted Web Interviewing technology (CAWI).

Using 2016 Census reference variables, the Canadian data was then analyzed and weighted by our statisticians according to gender, age, mother tongue, region, education level, presence of children in households, and according to the party they voted for in the last federal election in order to render a representative sample of the general population. Using 2010 U.S. Census reference variables, the American data was then analyzed and weighted by our statisticians according to gender, age, region, race/ethnicity, household size and education level in order to render a representative sample of the general population.

METHODOLOGICAL APPROACH

METHODOLOGY

The LEO (Leger Opinion) panel is the largest Canadian panel with over 400,000 representative panelists from all regions of Canada. LEO was created by Leger based on a representative Canadian sample of Canadian citizens with Internet access.

LEO's panelists were randomly selected (RDD) through Leger's call centre, panelists from more hard-to-reach target groups were also added to the panel through targeted recruitment campaigns. The double opt-in selection process, a model to detect fraud and the renewal of 25% of the panel each year ensures complete respondent quality. To ensure a higher response rate and reach people on their mobile devices, Leger has also developed a high-performance Apple and Android application.

In fact, Leger is the only Canadian research firm offering both the number and quality of panelists. Most competing polling firms in Canada and the United States also use the LEO panel.

METHODOLOGICAL APPROACH

METHODOLOGY

A margin of error cannot be associated with a non-probability sample in a panel survey. For comparison purposes, a probability sample of this size would have a margin of error $\pm 2.49\%$, **19 times out of 20** for the Canadian sample and of $\pm 3.09\%$, **19 times out of 20** for the American sample. The results presented in this study comply with the public opinion research standards and disclosure requirements of CRIC (the Canadian Research and Insights Council) and the global ESOMAR network. Leger is a founding member of CRIC and is actively involved in raising quality standards in the survey industry. President Jean-Marc Léger is a member of the CRIC's Board of Directors and the Canadian representative of ESOMAR.

METHODOLOGICAL APPROACH

METHODOLOGY

Leger is the polling firm that has presented the most accurate data, on average, over the last ten years in Canada. During the last federal election in 2019, Leger was once again **the most accurate firm in the country**. This accuracy is attributed to the quality of the LEO panel and rigorous application of methodological rules by Leger's 600 employees, including 200 professionals in Leger's eight offices across Canada (Montreal, Toronto, Quebec City, Winnipeg, Calgary, Edmonton and Vancouver) and in the United States (Philadelphia).

Poll aggregator 338Canada.com gave Leger the highest rating among all polling firms in Canada for the accuracy of its studies. See <https://338canada.com/pollster-ratings.htm>

NOTES ON READING THIS REPORT

METHODOLOGY

The numbers presented have been rounded. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicates a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicates a significantly higher proportion than that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-President at the following e-mail address: cbourque@leger360.com or Jack Jedwab, President & CEO of the Association for Canadian Studies: jack.jedwab@acs-aec.ca.

For any questions related to our services, or to request an interview, please contact us [by clicking here](#).

APPENDIX

DETAILED METHODOLOGY

WEIGHTED AND UNWEIGHTED SAMPLE

The table below presents the Canadian geographic distribution of respondents before weighting.

| Province | Unweighted | Weighted |
|-----------------------|------------|----------|
| British Columbia | 156 | 209 |
| Alberta | 134 | 173 |
| Manitoba/Saskatchewan | 128 | 101 |
| Ontario | 606 | 593 |
| Quebec | 418 | 362 |
| Atlantic | 102 | 106 |

The table below presents the American geographic distribution of respondents before weighting.

| US Region | Unweighted | Weighted |
|-----------|------------|----------|
| NorthEast | 199 | 180 |
| MidWest | 209 | 218 |
| South | 377 | 372 |
| West | 219 | 234 |

DETAILED METHODOLOGY

WEIGHTED AND UNWEIGHTED SAMPLE FOR CANADA

The following tables present the demographic distribution of respondents according to gender, age and language (mother tongue) for Canada.

| GENDER | Unweighted | Weighted |
|--------|------------|----------|
| Male | 859 | 750 |
| Female | 694 | 794 |

| AGE | Unweighted | Weighted |
|-------------------|------------|----------|
| Between 18 and 34 | 425 | 408 |
| Between 35 and 54 | 609 | 551 |
| 55 or over | 609 | 586 |

| LANGUAGE (MOTHER TONGUE) | Unweighted | Weighted |
|--------------------------|------------|----------|
| English | 975 | 1,030 |
| French | 354 | 321 |
| Other | 215 | 193 |

The sample thus collected has a minimum weighting factor of 0.1704 and a maximum weighting factor of 4.9815. The weighted variance is 0.4750.

DETAILED METHODOLOGY

WEIGHTED AND UNWEIGHTED SAMPLE FOR THE UNITED STATES

The following tables present the demographic distribution of respondents according to gender and age for the United States.

| GENDER | Unweighted | Weighted |
|--------|------------|----------|
| Male | 493 | 487 |
| Female | 511 | 517 |

| AGE | Unweighted | Weighted |
|-------------------|------------|----------|
| Between 18 and 29 | 132 | 176 |
| Between 30 and 39 | 210 | 218 |
| Between 40 and 49 | 187 | 187 |
| Between 50 and 64 | 292 | 251 |
| 65 or older | 183 | 173 |

The sample thus collected has a minimum weighting factor of 0.2759 and a maximum weighting factor of 3.8598. The weighted variance is 0.2975.
