

Leger

WEEKLY SURVEY

November 2nd, 2020

THE CANADIAN PRESS

METHODOLOGY

METHODOLOGY

Leger, the largest Canadian-owned polling and marketing research firm, in collaboration with the Canadian press, conducted this Web survey with a representative sample of **1,516 Canadians and 1,001 Americans**, over the age of 18, selected from LEO's (Leger Opinion) representative panel. The questionnaire consisted of 25 questions and was completed in 10 minutes on average. Data collection took place from **October 29th to November 1st, 2020**, via Computer-Assisted Web Interviewing technology (CAWI). Using 2016 Census reference variables, the Canadian data was then analyzed and weighted by our statisticians according to gender, age, mother tongue, region, education level and the presence of children in households in order to render a representative sample of the general population. Using 2010 U.S. Census reference variables, the American data was then analyzed and weighted by our statisticians according to gender, age, region, race/ethnicity, household size and education level in order to render a representative sample of the general population.

The LEO (Leger Opinion) panel is the largest Canadian panel with over 400,000 representative panelists from all regions of Canada. LEO was created by Leger based on a representative Canadian sample of Canadian citizens with Internet access. LEO's panelists were randomly selected (RDD) through Leger's call centre, panelists from more hard-to-reach target groups were also added to the panel through targeted recruitment campaigns. The double-opt-in selection process, a model to detect fraud and the renewal of 25% of the panel each year ensures complete respondent quality. To ensure a higher response rate and reach people on their mobile devices, Leger has also developed a high-performance Apple and Android application. In fact, Leger is the only Canadian research firm offering both the number and quality of panelists. Most competing polling firms in Canada and the United States also use the LEO panel.

A margin of error cannot be associated with a non-probability sample in a panel survey. For comparison purposes, a probability sample of this size would have a margin of error **±2.52%, 19 times out of 20** for the Canadian sample and of **±3.1%, 19 times out of 20** for the American sample. The results presented in this study comply with the public opinion research standards and disclosure requirements of CRIC (the Canadian Research and Insights Council) and the global ESOMAR network. Leger is a founding member of CRIC and is actively involved in raising quality standards in the survey industry. President Jean-Marc Léger is a member of the CRIC's Board of Directors and the Canadian representative of ESOMAR.

Leger is the polling firm that has presented the most accurate data, on average, over the last ten years in Canada. During the last federal election in 2019, Leger was once again the most accurate firm in the country. This accuracy is attributed to the quality of the LEO panel and rigorous application of methodological rules by Leger's 600 employees, including 200 professionals in Leger's eight offices across Canada (Montreal, Toronto, Quebec City, Winnipeg, Calgary, Edmonton and Vancouver) and in the United States (Philadelphia).

Poll aggregator 338Canada.com gave Leger the highest rating among all polling firms in Canada for the accuracy of its studies. See <https://338canada.com/pollster-ratings.htm>

Federal Elections 2019		
Federal Parties	Leger Survey	Official Results
LPC	33%	33%
CPC	33%	34%
NDP	18%	16%
BQ	8%	8%
Green	6%	7%
PPC	2%	2%

METHODOLOGY

Notes on Reading this Report

The numbers presented have been rounded. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-President at the following e-mail address: cbourque@leger360.com or Jack Jedwab, President & CEO of the Association for Canadian Studies: jack.jedwab@acs-aec.ca

U.S. POLITICS

2020 VOTING INTENTIONS

CTC255. If the 2020 presidential election were held today, would you vote for Donald Trump, Joe Biden, Jo Jorgensen, Kanye West or Howie Hawkins?

In the event that a respondent had no opinion, the following follow-up question was asked:

CTC255B. Even if your choice is not made yet, if you had the obligation, who would you most likely vote for at the 2020 presidential election between Donald Trump, Joe Biden, Jo Jorgensen, Kanye West or Howie Hawkins?

Base: Respondents who are registered to vote and who intend to vote in the next election

CTC252B. Did you vote for Donald Trump, Joe Biden, Jo Jorgensen, Kanye West or Howie Hawkins?* Base: Respondents who have already voted

	TOTAL USA	TOTAL Decided voters	North-East	Mid-West	South	West	18-34	35-54	55+	Male	Female

APPENDIX

DETAILED METHODOLOGY

Weighted and Unweighted Sample

The table below presents the Canadian geographic distribution of respondents before weighting.

Province	Unweighted	Weighted
British Columbia	152	206
Alberta	126	170
Manitoba/Saskatchewan	125	99
Ontario	603	582
Quebec	409	356
Atlantic	101	104

The table below presents the American geographic distribution of respondents before weighting.

US region	Unweighted	Weighted
NorthEast	181	179
MidWest	218	217
South	361	371
West	241	233

DETAILED METHODOLOGY

Weighted and Unweighted Sample for Canada

The following tables present the demographic distribution of respondents according to gender, age and language (mother tongue) for Canada.

GENDER	Unweighted	Weighted
Male	779	736
Female	737	780

AGE	Unweighted	Weighted
Between 18 and 34	386	413
Between 35 and 54	469	517
55 or over	661	586

LANGUAGE (MOTHER TONGUE)	Unweighted	Weighted
English	931	1,013
French	402	315
Other	182	187

The sample thus collected has a minimum weighting factor of 0.0686 and a maximum weighting factor of 4.1614. The weighted variance is 0.4298.

DETAILED METHODOLOGY

Weighted and Unweighted Sample for The United States

The following tables present the demographic distribution of respondents according to gender and age for The United States.

GENDER	Unweighted	Weighted
Male	485	485
Female	516	516

AGE	Unweighted	Weighted
Between 18 and 29	169	220
Between 30 and 39	189	172
Between 40 and 49	189	186
Between 50 and 64	270	250
65 or older	184	172

The sample thus collected has a minimum weighting factor of 0.5225 and a maximum weighting factor of 2.9203 The weighted variance is 0.1167.
