Association for Canadian Studies • Association d'études canadiennes

September 8th, 2020

METHODOLOGY

METHODOLOGY

Leger,the largest Canadian-owned polling and marketing research firm, in collaboration with the Canadian press, conducted this Web survey with a representative sample of **1,529 Canadians and 1,001 Americans,** over the age of 18, selected from LEO's (Leger Opinion) representative panel. The questionnaire consisted of 25 questions and was completed in 10 minutes on average. Data collection took place from **September 4th to September 6th, 2020**, via Computer-Assisted Web Interviewing technology (CAWI). Using 2016 Census reference variables, the Canadian data was then analyzed and weighted by our statisticians according to gender, age, mother tongue, region, education level and the presence of children in households in order to render a representative sample of the general population. Using 2010 U.S. Census reference variables, the American data was then analyzed and weighted by our statisticians according to gender, age, region, race/ethnicity and household size in order to render a representative sample of the general population.

The LEO (Leger Opinion) panel is the largest Canadian panel with over 400,000 representative panelists from all regions of Canada. LEO was created by Leger based on a representative Canadian sample of Canadian citizens with Internet access. LEO's panelists were randomly selected (RDD) through Leger's call centre, panelists from more hard-to-reach target groups were also added to the panel through targeted recruitment campaigns. The double-opt-in selection process, a model to detect fraud and the renewal of 25% of the panel each year ensures complete respondent quality. To ensure a higher response rate and reach people on their mobile devices, Leger has also developed a high-performance Apple and Android application. In fact, Leger is the only Canadian research firm offering both the number and quality of panelists. Most competing polling firms in Canada and the United States also use the LEO panel.

A margin of error cannot be associated with a non-probability sample in a panel survey. For comparison purposes, a probability sample of this size would have a margin of error **±2.51%, 19 times out of 20** for the Canadian sample and of **±3.1%, 19 times out of 20** for the American sample. The results presented in this study comply with the public opinion research standards and disclosure requirements of CRIC (the Canadian Research and Insights Council) and the global ESOMAR network. Leger is a founding member of CRIC and is actively involved in raising quality standards in the survey industry. President Jean-Marc Léger is a member of the CRIC's Board of Directors and the Canadian representative of ESOMAR.

Leger is the polling firm that has presented the most accurate data, on average, over the last ten years in Canada. During the last federal election in 2019, Leger was once again the most accurate firm in the country. This accuracy is attributed to the quality of the LEO panel and rigorous application of methodological rules by Leger's 600 employees, including 200 professionals in Leger's eight offices across Canada (Montreal, Toronto, Quebec City, Winnipeg, Calgary, Edmonton and Vancouver) and in the United States (Philadelphia).

Poll aggregator 338Canada.com gave Leger the highest rating among all polling firms in Canada for the accuracy of its studies. See https://338canada.com/pollster-ratings.htm

Federal Elections 2019		
Federal Parties	Leger Survey	Official Results
LPC	33%	33%
CPC	33%	34%
NDP	18%	16%
BQ	8%	8%
Green	6%	7%
PPC	2%	2%

METHODOLOGY

Notes on Reading this Report

The numbers presented have been rounded. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

In this report, data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion that that of other respondents.

A more detailed methodology is presented in the appendix.

If you have questions about the data presented in this report, please contact Christian Bourque, Associate and Executive Vice-Present at the following e-mail address: cbourque@leger360.com or Jack Jedwab, President & CEO of the Association for Canadian Studies: jack.jedwab@acs-aec.ca

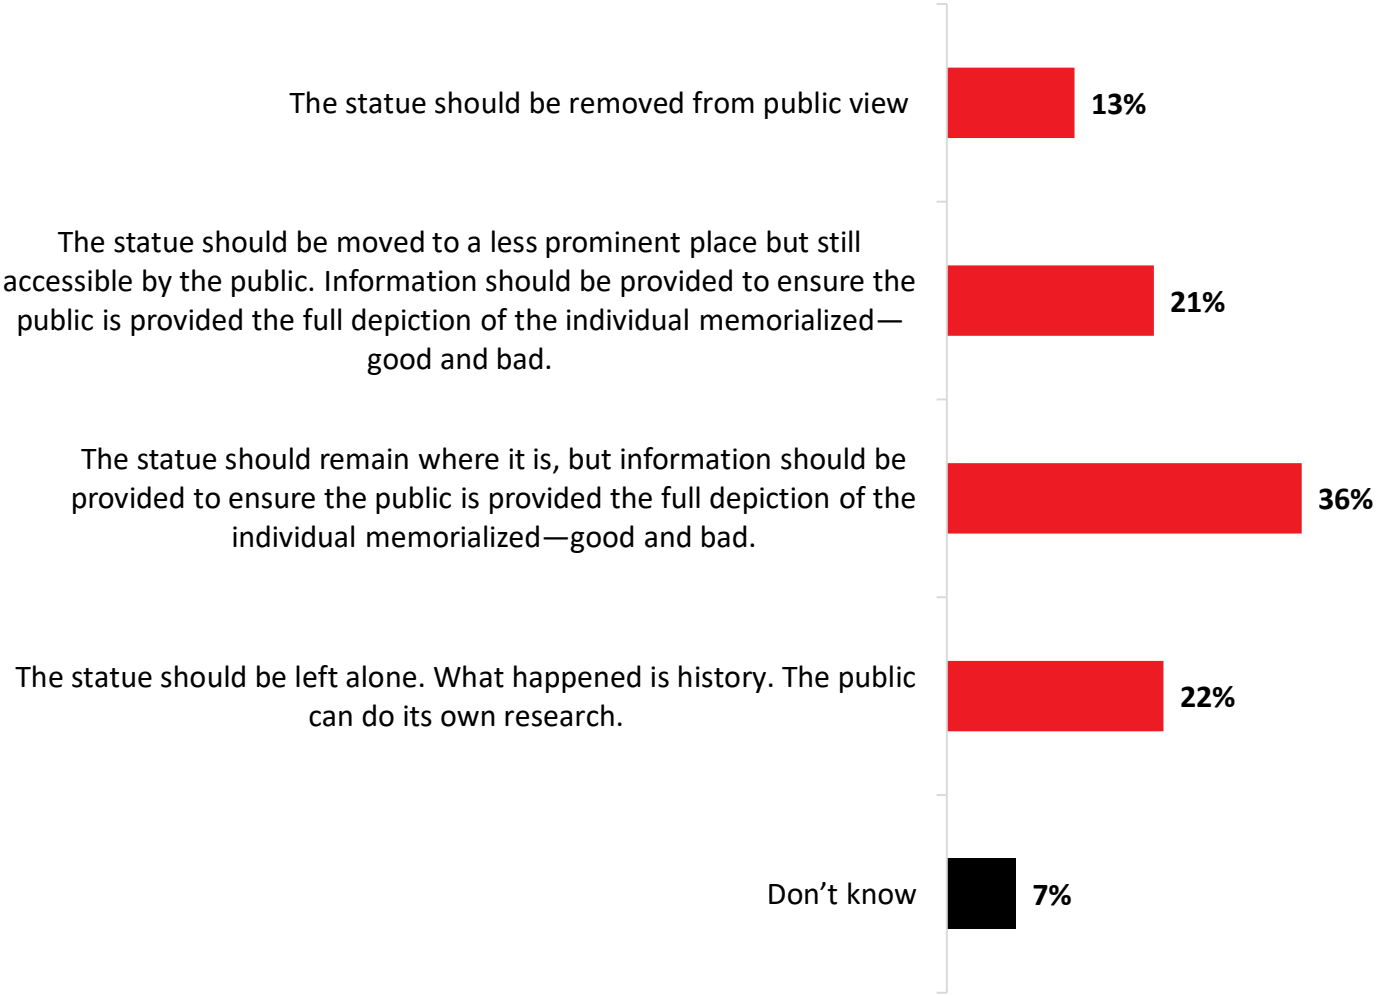
Don't know / Prefer not to answer	19%	21%	2

New question

HANDLING SITUATIONS WITH STATUES

CTC286. There has been media coverage of late regarding historic figures in Canada that have been memorialized in statues, that upon closer scrutiny of their conduct, are found to have a questionable, and in some cases, offensive past—often in relation to the treatment of Indigenous peoples or other minorities. How should these situations with statues be handled when they come to light?

Base: All respondents (n=1,529)



New question

HANDLING SITUATIONS WITH STATUES - DETAILS

CTC286. There has been media coverage of late regarding historic figures in Canada that have been memorialized in statues, th at upon closer scrutiny of their conduct, are found to have a questionable, and in some cases, offensive past—often in relation to the treatment of Indigenous peoples or other minorities. How should these situations with statues be handled when they come to light?

Base: All respondents

	TOTAL CANADA	ATL	QC	ON	MB/SK	AB	BC	18-34	35-54	55+	Urban	Sub-urban	Rural

ANNEXES

DETAILED METHODOLOGY

Weighted and Unweighted Sample

The table below presents the Canadian geographic distribution of respondents before weighting.

Province	Unweighted	Weighted
British Columbia	155	207
Alberta	125	172
Manitoba/Saskatchewan	125	100
Ontario	600	587
Quebec	424	359
Atlantic	100	105

The table below presents the American geographic distribution of respondents before weighting.

US region	Unweighted	Weighted
NorthEast	220	179
MidWest	188	217
South	307	371
West	286	233

DETAILED METHODOLOGY

Weighted and Unweighted Sample for Canada

The following tables present the demographic distribution of respondents according to gender, age and language (mother tongue) for Canada.

GENDER	Unweighted	Weighted
Male	784	743
Female	745	786

AGE	Unweighted	Weighted
Between 18 and 34	427	407
Between 35 and 54	483	526
55 or over	619	596

LANGUAGE (MOTHER TONGUE)	Unweighted	Weighted
English	903	997
French	407	318
Other	219	214

The sample thus collected has a minimum weighting factor of 0.0881 and a maximum weighting factor of 4.2800. The weighted variance is 0.4552.

DETAILED METHODOLOGY

Weighted and Unweighted Sample for The United States

The following tables present the demographic distribution of respondents according to gender and age for The United States.

GENDER	Unweighted	Weighted
Male	501	485
Female	500	516

AGE	Unweighted	Weighted
Between 18 and 29	104	220
Between 30 and 39	197	172
Between 40 and 49	172	186
Between 50 and 64	304	250
65 or older	224	172

The sample thus collected has a minimum weighting factor of 0.3828 and a maximum weighting factor of 3.2353. The weighted variance is 0.2398.
