

REPORT

**Alberta Pension Plan** 

National & Alberta Omni Report

### Methodology

#### Method

Online survey of n=2,480 Canadian respondents 18 years of age or older:

- 1,604 Canadians 18 years of age or older, with quotas in place to generate a demographically representative sample that aligns with Statistics Canada estimates.
- An additional 876 Albertans 18 years of age or older (for a total of 1,001), to meet provincial quotas set with the aim of allowing for more precise analysis within the province.

#### When

October 27<sup>th</sup> to October 30<sup>th</sup>, 2023

#### Margin of error

For comparison purposes, a probability sample of n=2,480 yields a margin of error no greater than  $\pm 2.0\%$  (19 times out of 20) for the total Canadian sample.

- For comparative purposes, a probability sample of 1,001 respondents would have a margin of error of ±3.1%, 19 times out of 20 for a population size equivalent to Alberta's.
- For comparative purposes, a probability sample of 1,479 respondents would have a margin of error of  $\pm 2.6\%$ , 19 times out of 20 for a population size equivalent to Canada's excluding Alberta.

### Methodology

#### Weighting

Results were weighted according to age, gender, mother tongue, region, education and presence of children in the household in order to ensure a representative sample of the Canadian and Albertan populations.

# Significant differences

Data in bold **red** characters (or with adjacent ↓) indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters (or with adjacent ↑) indicate a significantly higher proportion than that of other respondents.

#### **Rounded data**

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

#### **Questions**

Have questions about the data presented in this report? Please contact Andrew Enns, Executive Vice President, at the following e-mail address: aenns@leger360.com

A more detailed methodology is presented in the Appendix.

### Methodology

Leger is the polling firm that has presented the most accurate election survey data, on average, over the last ten years in Canada. During the last federal election in 2021, Leger was once again **the most accurate firm in the country**. This accuracy is attributed to the quality of the LEO panel and rigorous application of methodological rules by Leger's 600 employees, including 200 professionals in Leger's eight offices across Canada (Montreal, Toronto, Quebec City, Winnipeg, Calgary, Edmonton and Vancouver) and in the United States (New York).

Poll aggregator 338Canada.com gave Leger the highest rating among all polling firms in Canada for the accuracy of its studies. See <a href="https://338canada.com/pollster-ratings.htm">https://338canada.com/pollster-ratings.htm</a>

### **Key Highlights**

From October 27 to 30, 2023, we surveyed Canadians to know more about their perspectives on the Alberta's government's plan to withdraw Alberta from the Canadian Pension Plan and replace it with a new provincial pension plan, as well as the Canadian Pension Plan itself.

#### Some of the key highlights of our survey include...

- Support for Alberta's separation from the in Alberta has grown over the past 6 months (up 6 points), due primarily to increased support among UCP supporters.
  - Overall, 27% of Albertans support the government's proposed creation of a new provincial pension program. Support is highest among UCP voters (54% support) and those age 18 to 34 (32%)
  - Overall, 48% of Albertans currently oppose the government's plan to withdraw from the CPP. Opposition is greatest among NDP voters (82% oppose), retirees (58%) and those age 55 and older (55%)
- Overall, Canadians outside of Alberta at this moment are largely ambivalent regarding Alberta Pension Plan, with 50% unsure or not having an opinion.
- 71% of Albertans reported that they are familiar with the UCP's proposed plan to withdraw Alberta from the CPP and create Alberta's own pension plan, whereas only 29% of those from the rest of Canada said they were familiar.

## **Key Highlights (ii)**

- Interestingly, when examining the results to a series of attitudinal statements regarding the CPP, opinions of Albertans toward the program are not significantly different from those of Canadians in general:
  - CPP is well managed: AB-57% Agree v. Rest of CDN-50% Agree
  - CPP benefits be equitably distributed: AB-75% Agree v. Rest of CDN-74% Agree
  - Residents who pay more CPP should get more: AB-55% Agree v. Rest of CDN-54% Agree
