U.S. Politics: Biden-Harris Transition

Survey of Americans

DATE 2024-07-31

Methodology

Method

An online survey among 1,002 Americans 18 years of age or older.

Respondents were randomly recruited using LEO's online panel.

When

July 26 to July 28, 2024.

Margin of error

For comparison purposes, a probability sample of this size yields a margin of error no greater than ±3.1%, (19 times out of 20).

Weighting

Results were weighted according to **age, gender, region, education, race, number of people in the household** in order to ensure a representative sample of the American population.

Methodology

Significant differences

Data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion that that of other respondents.

Rounded data

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

Questions

Have questions about the data presented in this report? Please contact Andrew Enns, Executive Vice-President, Central Canada at the following e-mail addresses: aenns@leger360.com

A more detailed methodology is presented in the Appendix.

Key highlights

Some of the key highlights from our U.S. Politics Survey include…

Harris and Trump are in a tight race with less than 100 days to go before the election

- If the presidential election were held today, Harris would receive 49% of the votes and Trump 46%. Noteworthy is the significant decrease in the number of voters who would support another candidate, dropping from 12% in June 2024 to 5% in July 2024. Since our last poll in June 2024, 3rd party voters have shifted towards the two main political parties, with the Democrats gaining 4 points and the Republicans gaining 3 points.

- More than 4 in 10 Americans (41%) believe Biden should now resign as President of the United States as opposed to staying until on next January.

Kamala Harris' gender and ethnicity would have very little impact on the vote, while being convicted of a felony has a slightly more significant impact.

- When it comes to gender, 66% of Americans think that Kamala Harris being a woman has no impact on how they will vote. Similarly, 72% of Americans say her identity has no impact on their voting decision.

- The picture is more nuanced regarding Donald Trump's conviction of a felony: 40% of Americans say it makes them more likely to vote against him, while 43% say it makes no difference.

Both Democrats and Republicans fear an assassination attempt on their leader

- 61% of Republicans fear an assassination attempt on Donald Trump during the election, while 45% of Democrats fear an assassination attempt on Kamala Harris.
