NATIONAL POST

Survey of Canadians

August 2024

Methodology

Method

Online survey among respondents 18 years of age or older. (Canadian sample: n= 1,602). Respondents had the option of completing the survey in English or in French and were randomly recruited using LEO's online panel.

When

August 23 to August 25, 2024

Margin of error

For comparison purposes, a probability sample of this size yields a margin of error no greater than $\pm 2.45\%$, (19 times out of 20) for the Canadian sample.

Weighting

Results were weighted according to **age, gender, mother tongue, region, education and presence of children in the household** in order to ensure a representative sample of the Canadian population.

Methodology

Significant differences

Data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

Rounded data

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

Questions

Have questions about the data presented in this report? Please contact Andrew Enns, Executive Vice-President, Central Canada at the following e-mail addresses: aenns@leger360.com

A more detailed methodology is presented in the Appendix.

Methodology

Leger is the polling firm that has presented the most accurate election survey data, on average, over the last ten years in Canada. During the last federal election in 2021, Leger was once again **the most accurate firm in the country**. This accuracy is attributed to the quality of the LEO panel and rigorous application of methodological rules by Leger's 600 employees, including 200 professionals in Leger's eight offices across Canada (Montreal, Toronto, Quebec City, Winnipeg, Calgary, Edmonton and Vancouver) and in the United States (New York).

Poll aggregator 338Canada.com gave Leger the highest rating among all polling firms in Canada for the accuracy of its studies. See <https://338canada.com/pollster-ratings.htm>

Key Highlights (1/2)

Every month, we conduct a survey of Canadians to explore their views on the current government and politics in Canada. This month, our survey was conducted between August 23 and 25, 2024.

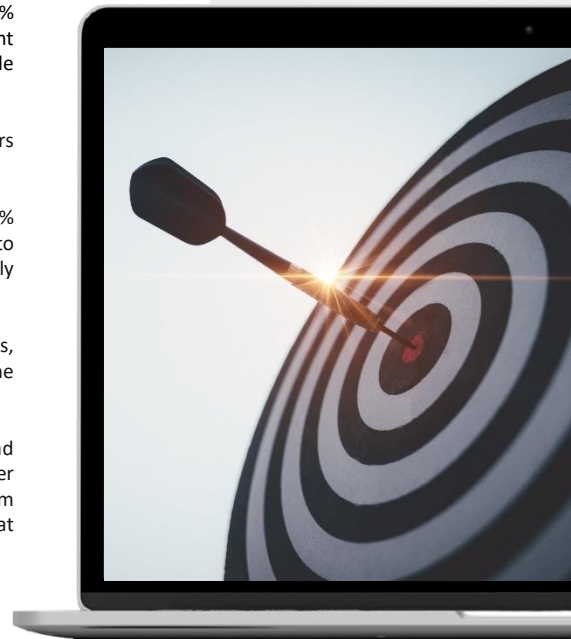

Some of the key highlights of our survey about Canadian federal politics include...

- Pierre Poilievre's Conservative Party is currently leading by 18 points, ahead of Justin Trudeau's Liberal Party. If a federal election were held today, 43% of Canadians would vote for the Conservative Party of Canada, while 25% would vote for Justin Trudeau's Liberal Party. Jagmeet Singh's NDP (15%) has seen a 5-point decrease compared to last month.
- There continues to be significant dissatisfaction with Justin Trudeau's government among Canadians. Two-thirds of Canadians (65%) are dissatisfied, while only 28% say they are currently satisfied. Only 4% of respondents reported being "very satisfied" with the current government, while a substantial 40% are "very dissatisfied."
- Two-thirds of Canadians (65%) believe the Government of Canada will admit too many immigrants with its current immigration plan. Only 20% think it will admit the right number, while 3% believe it will not admit enough. The survey also found that Canadians aged 55 and older (73%), those living in rural areas (75%), and Conservative voters (86%) are more likely to think that the current immigration plan is admitting too many immigrants in Canada.
- A majority of Canadians believe that the current immigration rates are contributing to the housing crisis (78%), to stresses on health care services (76%), and that Canada's immigration policy is too generous (72%). Conservative voters are more likely to agree with those statements.

Key Highlights (2/2)

- Canadians are divided on the issue of increasing the number of Gazan refugees. 41% support the government policy of increasing the number of refugees by five, while 43% are opposed to it. Similarly, nearly two out of three Canadians (64%) are not confident that the Government of Canada is thoroughly screening immigrants from the Middle East.
- More than half of Canadians (57%) are not familiar with the temporary foreign workers program administered by the Federal government, while 43% are familiar with it.
- Around half of Canadians (48%) have a positive impression of the program, while 38% have a negative impression, and 14% do not know. Quebecers, at 61%, are more likely to have a positive impression of the program. Conservative voters, at 54%, are more likely to have a negative impression of the program.
- Half of Canadians (49%) support using the program to fill low-wage or low-skill jobs, while 39% oppose it. Quebecers, at 49%, are more likely to support the use of the program, while Conservative voters, at 55%, are more likely to oppose it.
- 53% of Canadians think that companies should not use the TFW program and instead should offer higher-wage jobs to attract people already living in Canada. On the other hand, 30% think that companies should continue to be allowed to use the TFW program to bring employees to Canada. Conservative voters are more likely to think that companies should not use the program.

REPORT

Federal Voting Intentions & Government Satisfaction

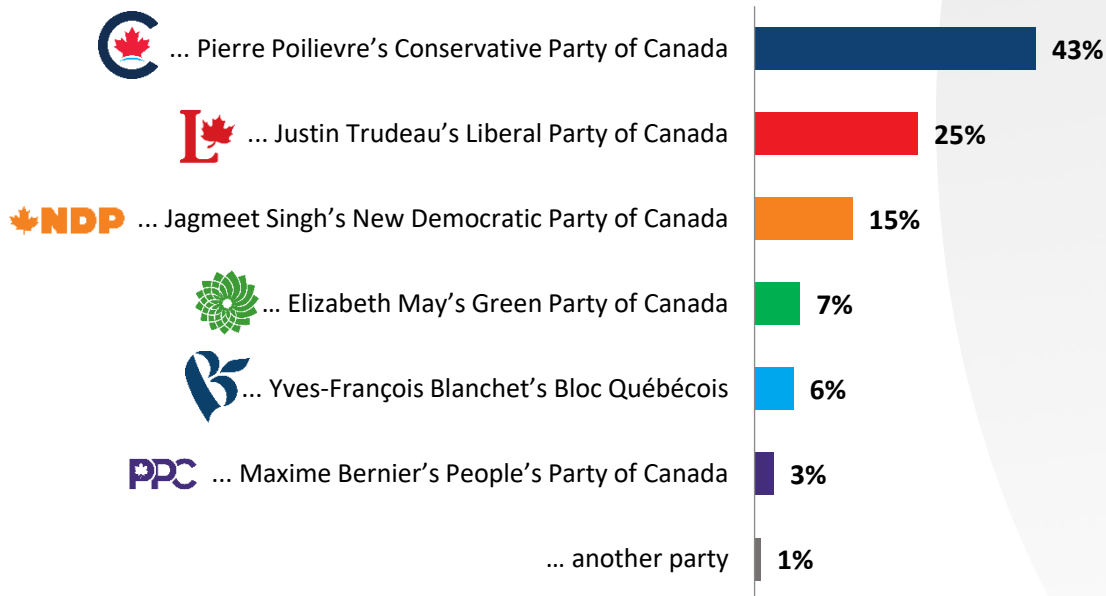

Survey of Canadians

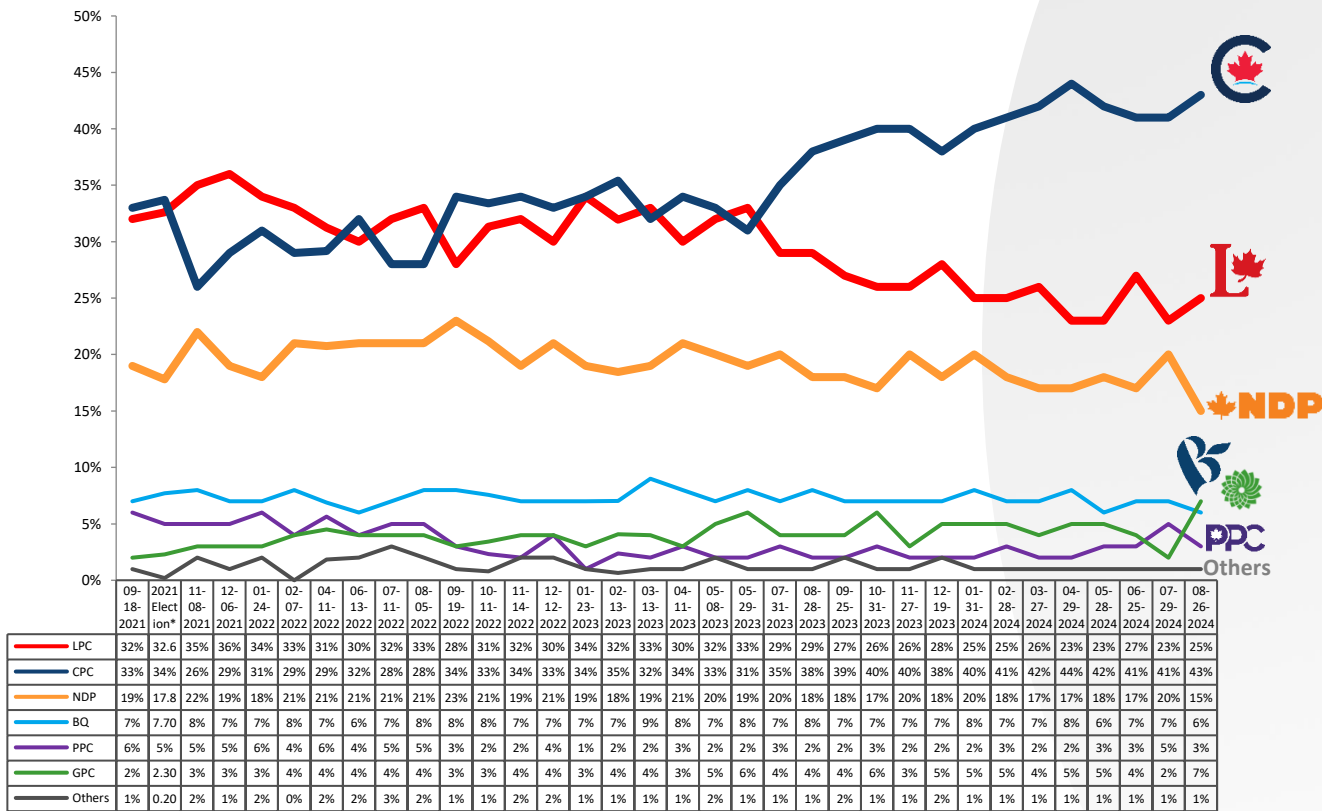

Voting Intentions - Federal Elections (1/2)

Q1. If a federal election were held today, for which political party would you be most likely to vote? Would it be for...? *In the event a respondent had no opinion, the following prompting question was asked: Even if you have not yet made up your mind, for which of the following political parties would you be most likely to vote? Would it be for the ...*

Base: Decided voters (n=1,295), except for the Bloc Québécois, Quebecers only

Impression of the Temporary Foreign Workers Program (1/3)

Q6. The Temporary Foreign Worker (TFW) Program allows Canadian employers to hire foreign workers to fill jobs when they are able to demonstrate they are having difficulty filling the positions with qualified Canadians. Supporters of the program say, this allows companies to continue to grow and contribute to the economy. Based on what you have heard of the program, do you have a positive or negative impression of the Temporary Foreign Workers program?

Base: All respondents (n=1,602)

Impression of the Temporary Foreign Workers Program (2/3)

Perspectives on the Use of TFW Program for Low-Wage Jobs (1/3)

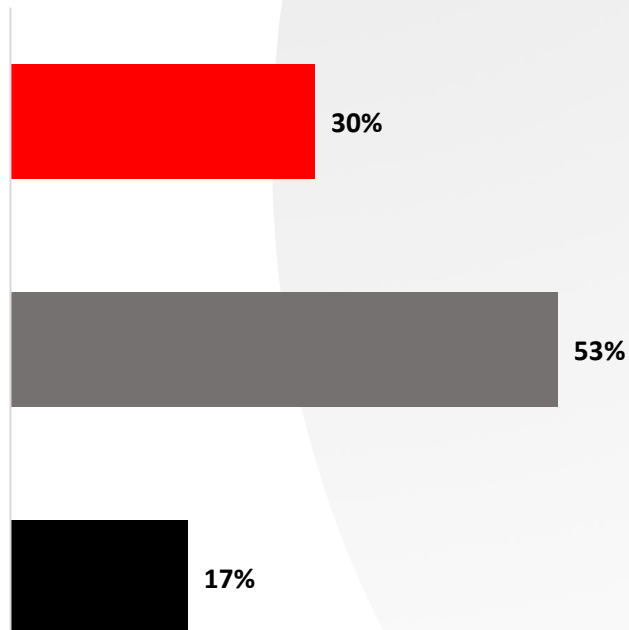

Q8. Below are two points of view regarding using the Temporary Foreign Workers (TFW) program to bring in low wage/low-skill workers to fill jobs in Canada. Please select the point of view that most closely reflects your thinking on the issue?

Base: All respondents (n=1,602)

Canadian companies **should continue to be allowed to use the TFW program** to bring in low wage/low-skill employees as it fulfils a hiring need and allows these companies to hire people at potentially lower wages and benefits than if they had to hire internally in Canada.

Canadian companies **should not be allowed to use the TFW program to bring in low wage/low-skill employees** to fulfils hiring needs. Instead, these companies should offer hard to fill jobs at higher wages and benefits to attract people already living in Canada.
