# Methodology

Every month, we conduct a survey of Canadians to explore their voting intentions and opinions on key federal political issues.

## Method

Online survey among respondents 18 years of age or older. (Canadian sample: **n= 3,002**).

Respondents had the option of completing the survey in French and English and were randomly recruited using LEO's online panel.

## Weighting

Results were weighted according to **age, gender, mother tongue, region, education and presence of children in the household** in order to ensure a representative sample of the Canadian population.

## When

Data collection from **March 26 to March 31, 2025**.

## Margin of error

For comparison purposes, a probability sample of this size yields a margin of error no greater than **±1.79%**.

## Significant differences

Data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

## Rounded data

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.
