

Trump Tariffs Tracker

March 10, 2025

Methodology

Every week during this tumultuous period, we conduct a survey of Canadians and Americans to explore their views on the economy and their finances.

Method

Online survey among respondents 18 years of age or older.
(Canadian sample: **n= 1,548**
American sample: **n= 1,010**)

Respondents had the option of completing the survey in French and English and were randomly recruited using LEO's online panel.

Weighting

Results were weighted according to **age, gender, mother tongue, region, education and presence of children in the household** in order to ensure a representative sample of the Canadian population and according to **age, gender, region, education, ethnicity, and number of people in the household** in order to ensure a representative sample of the American population.

When

Data collection from **March 7 to March 10, 2025**.

Margin of error

For comparison purposes, a probability sample of this size yields a margin of error no greater than **±2.50%**, (19 times out of 20) for the Canadian sample and **±3.10%**, (19 times out of 20) for the American sample.

Significant differences

Data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

Rounded data

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.
